A.P.T James - 94 metre catamaran delivered to NIDCO, Trinidad and Tobago in 2019

ABOUT AUSTAL

Austal is a global shipbuilder, leading Defence Prime contractor, and trusted strategic partner in maritime technology. The company specialises in the design and construction of high-speed commercial and military vessels for the world's leading operators.

Since 1988, Austal has designed, built, and delivered more than 350 vessels to over 122 operators across 59 countries, reinforcing its position as the world's leading aluminium shipbuilder.

With a network of modern, safe, and efficient shipyards in Australia, the United States, the Philippines and Vietnam, Austal has firmly established its leadership in the global shipbuilding industry. The company's reputation is built on advanced engineering technologies and an optimised modular construction method, delivering outstanding efficiency in quality, schedule, and cost..

AUSTAL VIETNAM

Austal Vietnam's capability to deliver customised commercial vessel solutions is powered by an industry-leading team of highly skilled and experienced designers, engineers, shipbuilders, and service specialists. Since commencing operations, the team has successfully delivered three vessels—Hull 397, Hull 424, and Hull 425—in less than five years.

Located in Đông Xuyên Industrial Zone, Ho Chi Minh City, in southern Vietnam, Austal Vietnam officially began operations in March 2018 as part of Austal's long-term strategy to expand its global commercial shipbuilding capacity. The shipyard was established with a core design and fabrication team, strongly supported by Austal Australia's design and construction expertise.

The Austal Vietnam shipyard features modern facilities enabling best practice, modular construction processes that meet Austal's internationally renowned, high standards of quality and safety. The company expects to add great value to both the local community and the greater Vietnamese economy; generating local employment and supply chain opportunities. With an established network of subcontractors and supply chains, Austal Vietnam supports the purchasing and procurement of materials used in production from local businesses, wherever and whenever possible.

Austal Vietnam is geographically, financially and strategically positioned to cater to global market demands for high speed passenger and vehicle passenger ferries, work boats, offshore crew transfer vessels, windfarm vessels and other commercial and utility vessels.

Maria Galanta Express - 41 metre catamaran delivered to SGTM in 2019

Applying ISO 9001 and ISO 14001 certified design standards, Austal Vietnam adopts the same quality-assured processes and procedures developed by Austal Australia, which has been ISO 9001 accredited since 2005.

Key business functions — including Design, Engineering, Procurement, Human Resources, and post-delivery Warranty Support — are currently managed by Austal Australia. This approach minimises overhead costs and ensures consistent quality standards across the organisation. Austal Vietnam is efficiently and successfully building vessels, providing strong confidence and delivery certainty to customers and stakeholders.

Austal Vietnam’s local leadership team has a combined experience of over 80 years in shipbuilding, acquired at Austal in Australia and across the globe. This unrivalled expertise brings valuable, practical knowledge and provides industry-leading supervision for the dedicated and highly motivated Austal Vietnam team — all of whom communicate effectively in English. Together, these strengths ensure excellent communication, shipbuilding excellence, and on-time project delivery.

Austal Vietnam has delivered 3 vessels since opening in 2018, including the 66 metre Apetahi Express for The Degage Group of French Polynesia (left). The company is now expanding its product portfolio and pursuing strategic partnerships and new contracts to support sustainable future growth.
